# Welcome to the server for the introduction week of the winter semester 2021/22!

The server is intended to provide a platform for our orientation events, where you can exchange ideas with other first-year students and ask questions to (more or less) experienced students. To make sure that all this works well, here are a few hints and tips:

1. Please use the name with which you would like to be addressed at the university (you can change your nickname especially for this server. On a PC you can change your nickname by right clicking on your name in the sidebar on the right side of the screen and choosing "Change nickname". On a cell phone you have to wipe to the right, then you see all channels and at the top the name of the server, next to the names are three dots, if you click on them you get to the server settings and can also change your nickname).

2. Please read and follow our rules of conduct. You can find them in the `#rules` channel.

3. Roles: On the server there are different roles with different functions:
   - La Leitung: These crazy individuals are the main responsible for the organization and execution of this ophase
   - Vorkurs-Orga: The main people responsible for the implementation of the programming pre-course
   - Orga: These nice people have taken over the responsibility for one or more organizational parts of the Ophase
   - Tutor*in/Helfer*in: People who are your tutors! Ask them anything
   - FSS: The team that manages our own (physical) student council servers
   - M.Sc. People who are starting their first Master's semester in Computer Science this semester, plus an extra role that characterizes the specific Master's program
     – Computer Science (general computer science master)
     – Autonomous Systems
     – Distributed Software Systems
     – IT-Security
     – Internet- and Web-based Systems
     – Visual Computing
   - B.Sc. Ersti: People starting their first Bachelor's semester in Computer Science this semester
   - J.B.A. Ersti: People starting their first Joint Bachelor of Arts' semester this semester
   - B.Ed. Ersti: People starting their first Bachelor of Education's semester in Computer Science this semester
   - Lehramt Gymnasien: People starting their first semester in Teaching at Secondary Schools
   - Vorkursteilnehmer*in: People participating in the programming pre-course

4. Roll assignment:
   - If you signed up on our Pretix and entered your discord-ID, the CyberPretix-bot should assign you the matching roles.
   - If that is not the case, please write a short message in the role-assignment Channel, in which you state your field of study and whether you participate in the programming precourse, then our team will handle the role assignment. Two notes on that:
     – Please keep your messages concise in the role-assignment channel, it might become crowded
     – If it is crowded, it might also take some time until you get your roles

5. Addressing roles: with @role you notify all people who have these roles - but not all roles have the right to mention all others.

6. If you have questions or problems with the server, please contact the discord admins in the `#serverfeedback` channel. Suggestions for improvement should also be posted there.

**We wish you a lot of fun in the introduction week and much success in your studies!**
